

We don't just have books for the classroom.

From Steven I. Apfelbaum & Alan Haney

“A **well-written, well-produced**, and **authoritative** book, which I **recommend wholeheartedly** for readers with no appetite to tackle the specialized literature, but who have restoration projects in mind, at heart, or underway, especially on their own land.”
—*Conservation Biology*

“**Very well written**, and it is clear that the **authors have lived and breathed the subject**. Anyone involved in teaching this subject should have a copy for **inspiration and ideas**.”
—*Biological Conservation*

**Get both books for \$50—and FREE SHIPPING—
with code 4DIRTY when you order from
islandpress.org**

From David J. Tongway & John A. Ludwig

Abundantly illustrated with photos and figures that clearly explain concepts outlined in the book, *Restoring Disturbed Landscapes* is an **engaging and accessible** work designed specifically for restoration practitioners with limited training or experience in the field. It tells restorationists where to start, what information they need to acquire, and how to apply this information to their specific situations.

**Buy ALL THREE books for \$75.00—and FREE SHIPPING—with
code 4RESTORE when you order from islandpress.org**

Get your hands dirty with these restoration tools.

Part of the Science and Practice of Ecological Restoration Series
cosponsored by the Society for Ecological Restoration and Island Press

**Redeem codes 4DIRTY or 4RESTORE online at
islandpress.org or call 800.621.2736**

"An impeccable history of salmon politics beautifully researched and told with humor, despair, and, always, heart and force and clarity. A must-read."

—**RICK BASS**, author of *Winter: Notes from Montana*

Recovering a Lost River: Removing Dams, Rewilding Salmon, Revitalizing Communities makes a powerful argument for why dam removal makes good scientific, economic, and environmental sense—and requires our urgent attention.

"Very few writers have a sufficiently antic tone, an energetic enough intelligence, or a deep enough love to make enjoyable literature out of the ongoing federal crucifixion of the most important salmon river on this planet. Steven Hawley has found a perfect subject for his remarkable gifts."

—**DAVID JAMES DUNCAN**, author of *The River Why*

"Though there are echoes of some extraordinary authors in *Recovering a Lost River*—Henry David Thoreau, Aldo Leopold, and Edward Abbey—Steven Hawley writes with his own distinctly twenty-first-century voice about the inherent value of wild rivers and the environmental and social degradation caused by dams. Read it and learn—and act."

—**MICHAEL BAUGHMAN**, author of *A River Seen Right*

ZENTNER ZENTNER

Land Planning and Restoration

Success of environmental restoration projects is measured by their performance over time. That success is a direct reflection of the skill of the restoration team—and its ability to solve complex ecological and regulatory issues. Over the last decade, Zentner and Zentner has managed over 500 restoration projects.

Our services include:

- Wetland Delineations
- Restoration and Mitigation Planning
- Biological Assessments
- Endangered Species: Section 7 and 2081 Approvals
- Regulatory Planning and Permitting
- Construction and Post Construction Monitoring

MAKING A BIG IMPACT

Frontiers in Ecology and the Environment

With its timely, cross-disciplinary science, accessible writing style, four-color graphics and visually appealing format, *Frontiers in Ecology and the Environment* is read by scientists from a wide range of disciplines, as well as by policy makers, resource managers, educators, and students.

Impact factor: 6.82

**Visit: www.frontiersinecology.org
and see for yourself.**

Frontiers is different from other scientific journals, but delivers the same high-quality, peer-reviewed literature as the best of them.

Frontiers is a benefit of membership of the Ecological Society of America. Membership fees range from \$27–\$106.

And at only \$261–\$301 for a US institutional subscription, it's great value for your money.

For more information go to

**http://www.esa.org/member_services/join_renew.php

DRIWATER

TIME-RELEASE WATER

PLUS

TO

THRIVE

Initial Application

Plant Maintenance

**When irrigation is impractical,
DriWater® can help.**

Ideal for soil erosion projects & post-fire rehab

DriWater time release water gel is an innovative approach to remote planting irrigation and long-term watering. A non-polymer that supplies plants with water for up to 90 days. Safe, 100% degradable, consisting of 98% potable water and 2% food grade ingredients.

- Increases rooting up to 190%*
- Establishes trees in one growing season*
- Reusable, low profile, Tube and Gel packs for areas of high visibility
- Prolongs time between watering
- Non Polymer: does not compete for moisture
- Reduces transplant shock
- Supplies plants moisture at the root
- Avoids topical moisture reducing pests & weeds

Water where you need it.
