

restoration and/or management in urban and suburban natural areas. Sponsored by Wave Hill, a public garden and cultural institution which has a small restoration project under way. Contact: Susan Antenen, Wave Hill, 675 W. 252nd St., Bronx, NY 10471 (212) 549-3200.

- 77 Rare and Endangered Plants: A California Conference on their Conservation and Management**
November 5-8, 1986
Sacramento, California

While many people and organizations in California are involved in rare and endangered plant monitoring, mitigation and law, this is the first statewide conference on the subject.

Papers describing research on rare and endangered plants are requested and taxonomic studies are of interest, but the emphasis will be placed on management-related topics including field techniques and evaluating, monitoring and mitigating adverse effects. Contact: Jim Nelson, Conference Coordinator, California Native Plant Society, 909 12th St., Suite 116, Sacramento, CA 95814 (916) 447-2677, or Dr. Thomas Elias, Program Chairman, Rancho Santa Ana Botanic Garden, 1500 N. College Ave., Claremont, CA 91711 (714) 625-8767.

- 78 Lake and Reservoir Management: Influences of nonpoint source pollutants and acid precipitation**
November 5-8, 1986
Portland, Oregon

Sponsored by the North American Lake Management Society (NALMS), the symposium will emphasize the influence of nonpoint source pollutants and acid precipitation on water quality. Reservoir management and problems arising from these influences will be addressed. Concurrent sessions will focus on water quality assessment and data analysis procedures, management techniques and institutional arrangements. A one-day mini-symposium on acid rain will be featured. Contact: NALMS, P.O. Box 217, Merrifield, VA 22116 (202) 833-3382.

- 79 Third National Urban Forestry Conference**
December 6-10, 1986
Orlando, Florida

An opportunity for community activists to meet urban forestry professionals and other activists from across the country. Topics will include building coalitions, legislation and urban forestry success stories. For more information write the American Forestry Association, 1319 18th St., NW, Washington, DC 20036 (202) 467-5810.

- 80 American Society of Surface Mining and Reclamation annual meeting, in conjunction with the biennial Billings Symposium on Mining and Reclamation of the Great Plains**
March 17-19, 1986
Billings, Montana

Contact: Frank F. Munshower, Director
College of Agriculture, Montana State University,
Bozeman, MT 59717 (406) 994-4821.

New Project

- 81 Tallgrass Prairie Restoration and Management Planned (Colorado)**
William L. Baker, Department of Geography, University of Wisconsin-Madison 53706 (608) 262-1904

Tallgrass prairies (*Andropogon gerardii*, *Panicum virgatum*, *Sorghastrum nutans*, *Spartina pectinata*, etc.) persist as post-glacial relics in a few localities in the Rocky Mountain foothills. Wet to dry prairies in 10 parcels, totaling 110 ha, on City of Boulder lands were designated a Colorado State Natural Area in 1984. Management plans are now being designed. Issues to be addressed include: livestock grazing, fire, exotic plants, and restoration (particularly restoring forb diversity). Parts of the natural area have exclosures. Researchers interested in working on the site on these or other research questions are welcome to contact: David Kuntz, Colorado Natural Areas Program, State of Colorado, Dept. of Natural Resources, 1313 Sherman St., Suite 718, Denver, CO 80302 (303) 866-3311.

Shared Expertise

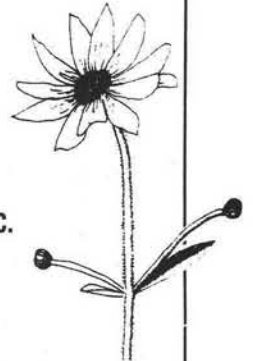

... a valued commodity for anyone involved in the management and restoration of our natural resources...At Prairie Nursery we place nearly two decades of shared expertise and experience at your calling . Next time you're looking for creative native plant solutions...fresh habitat ideas...ask us. We're more than an outstanding source for prairie seeds and plants; we're committed to assisting you in any way we can. Call us.

Prairie Restorations, Inc.

The process of maintaining balance within the total biotic community must become everyone's responsibility. At

PRAIRIE RESTORATIONS, INC.
we are working to encourage this process.

For information on how we might help you with site analysis, planning, restoration or management please call or write.

Third National Urban Forestry Conference

**Urban Forestry
for Livable Cities**

December 6-10, 1986

**Sheraton Twin Towers
Orlando, Florida**

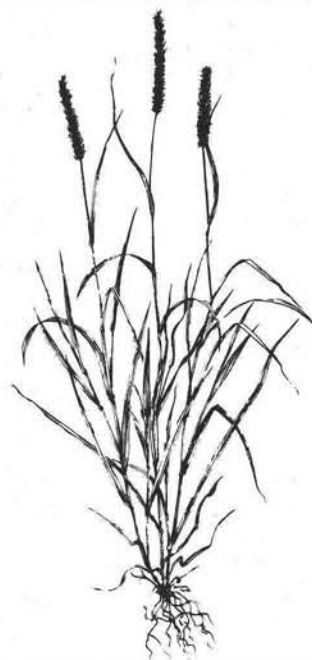

For program, exhibit, and registration information, write the American Forestry Association, 1319 18th Street, N.W., Washington, D.C. 20036.

Co-sponsored by The National Urban Forest Council, the American Forestry Association, USDA-Forest Service, and the Florida Division of Forestry-Department of Agriculture and Consumer Services.

NORTH AMERICAN RANGE PLANTS

- Third Edition
- By J. Stubbendieck, Stephan L. Hatch,
- and Kathie J. Hirsch

- Like its predecessors, the third edition of *North American Range Plants* is a valuable guide to 200 plants that are particularly significant for their abundance, desirability as forage, or noxious properties. Each species description includes nomenclature, life span, origin, season of growth, and inflorescence, vegetative, and growth characteristics. Forage value is estimated, and there are brief notes on habitat, livestock losses, and historical, medicinal, and food uses. Each plant is illustrated in detail, and distribution maps are included. March. **\$18.95** paper.

THE EARTH MANUAL

HOW TO WORK ON
WILD LAND WITHOUT
TAMING IT

- A step-by-step manual for
- controlling erosion
 - collecting wildflower seeds
 - building & maintaining trails
 - planting trees
 - improving wildlife habitat
 - plus information on how to enlist volunteers, and tips on working with youth groups.

HAWAII'S TERRESTRIAL ECOSYSTEMS

PRESERVATION AND MANAGEMENT

Charles P. Stone and

J. Michael Scott, editors

Distributed for Cooperative National Park Resources Studies Unit, University of Hawaii

The task of preserving and managing Hawaii's native ecosystems is complex and interesting—the reader will find much of general application to resource management problems everywhere. \$6.95, paper NEW!

THE ORIGINS OF JAPAN'S MODERN FORESTS

THE CASE OF AKITA

Conrad Totman

Asian Studies at Hawaii, No. 31

In this study of Akita, a major forest region, the author discusses how and why Japanese of the seventeenth century overcut their forest lands. He then traces the history of efforts to rebuild Akita's forests—a process that culminated in the development of vigorous programs of forest rehabilitation and afforestation. \$7.00, paper

SURFACE MINE RECLAMATION MANUAL

E. S. Lyle, Jr.

Auburn University, Alabama

Providing a concise discussion of theory and techniques for the revegetation, general reclamation, and control of erosion and sedimentation in surface mines, the **SURFACE MINE RECLAMATION MANUAL** emphasizes revegetation methods that will assure the best chance for successful vegetation establishment. This unique new guide features comprehensive descriptions of ● surface mine revegetation theory ● practical methods of revegetation ● methodology of erosion and sedimentation control. Essential theory and practice from such diverse fields as soil science, agronomy, forestry, hydrology, and engineering have been combined, yet complex terms have been simplified and condensed. An important guide for the reclamationist.

ELSEVIER

3/86 E105

Krieger Presents . . .

- **RETURNING TO EDEN: Animal Rights and Human Responsibility**

by Michael W. Fox

Orig. Ed. 1980, Reprint 1986

300 pp. \$19.95

This book is about the relationships, good and bad, between humans and other animals. It explores and exposes many of the contemporary human attitudes and values which together make us the most dangerous, destructive, selfish, and unethical animal on earth. The author looks at animal abuse—mismanagement of zoos, misguided attempts at wildlife conservation, misuse of laboratory animals, and the misunderstanding of the entire relationship between pets and owners.

- **BETWEEN ANIMAL AND MAN**

by Michael W. Fox

Orig. Ed. 1976, Reprint 1986

224 pp. \$16.50

Illustrating the strikingly similar behavioral patterns and emotional needs of animal and human existence, the author draws his pressing conclusions—chief among them that mankind must assume its critical role as steward of the biosphere. No longer can we regard animals as objects for manipulation, experimentation, exploitation; rather, we must become their protectors as we move towards a rekindled awareness of the "wild" side of our own nature and greater harmony with the natural world that surrounds us.

- **THE PHILOSOPHY AND PRACTICE OF WILDLIFE MANAGEMENT**

by Frederick F. Gilbert & Donald G. Dodds

Orig. Ed. 1986

Price Not Set

Most books on wildlife management tend to stress ecology and wildlife biology and fail to recognize that biopolitics are the true basis of effective management. This book, using examples from Canada, the United States, and developing countries, shows the mechanisms and historical foundations of wildlife management and traces the evolution of increasingly sophisticated approaches to the management of our natural fauna.

- **ENVIRONMENT, ENERGY, AND SOCIETY**

by Craig R. Humphrey & Frederick H. Buttel

Orig. Ed. 1982, Reprint 1986

302 pp. \$17.50

This book delineates the major ways in which human society and the environment affect each other. To study the structure of societies, it employs three conceptual models, or sociological paradigms—conservative, liberal, and radical.

- **CULTURAL RESOURCES MANAGEMENT**

by Ronald W. Johnson & Michael Schene

Orig. Ed. 1986

Pre-publication \$17.95

Cultural resources management is not only a national priority, with a protracted debate over funding levels; it is also the application of increasingly sophisticated techniques of public administration. The book is not meant to be encyclopedic or all-inclusive; it is a survey of the sweeping panorama of philosophies, techniques, and activities that are now the thrust of cultural resources management at the local, state, and national levels.

- **. . . AND THE DESERT SHALL REJOICE Conflict, Growth, and Justice in Arid Environments**

by Arthur Maas & Raymond L. Anderson

Orig. Ed. 1978, Reprint 1986

456 pp. \$32.50

This book is an exceptional study that relates the basic processes of the fundamental human activity of irrigation to immediate issues of community and to the larger questions of political justice. The authors do this by using modern techniques and concepts of water resource planning.

- **COLLEGIATE DICTIONARY OF ZOOLOGY**

by Robert W. Pennak

Orig. Ed. 1964, Reprint 1986

594 pp. \$24.50

This dictionary contains about 19,000 selected entries, which are "zoological" and rather specific. All zoological disciplines are included, e.g. taxonomy, morphology, anatomy, ecology, genetics, physiology, embryology, histology, and cytology.

When ordering, please add \$4.00 for the first book (\$1.00 each additional) to cover shipping.
