Subject Index

A Citizen's Guide to Protecting Wetlands, 170
Abies concolor, p. 20
Acer rubrum, 18
Acorus calamus, 23
Adapting a Stream: A Northwest Handbook, 110
Agalinis acuta, population studies of 178.5
Air-Earth Interface model, 148.3
Alafia River Crossing, 118.2
Alisma plantagoaquatica, 23
American Society for Surface Mining and Reclamation, 61
Anderson, Bertin p. 5
Andropogon scoparius, response to prescribed burns 86
Andropogon gerardi, 12
Angelica atropurpurea, 23

Arctotheca calendula, 142
Arizona Native Plant Society, 137
Armand Bayou Nature Center 12
Artemisia tridentata spp. *vaseyana*, dispersion pattern of 138.3
Asclepias ovalifolia, 3
Baccharis glutinosa p. 61
bank stabilization, 107.3
Berry Botanical Garden, 178.3
Betula lenta, 18
Big Thicket Nature Preserve, 92
bioengineering systems, 151.1
bionomics of tree planting, 100
bison impact on prairies, 13.11
Blackwood Creek, restoration of fisheries habitat 112.3
bog mat transplants, 24
bonding as a mitigation tool, 58.3
bottomland hardwoods; 17, 89, 90.5, 95
Bradshaw, Anthony 63
California native grasses, 16.1
California Assembly Bill 348, 93
California Natural Diversity Data Base, 58.2
California Oak Foundation, 62
California native grass seed, 78
Campton Forest Preserve, 8
Chamaedaphne calyculata augustifolia, 24
chaparral, burning of 41.2
Chicago Botanical Garden; 6, 7
Cirsium picheri, natural reproduction of 117.2
Cirsium hillii, 3
Coalition to Restore Coastal Louisiana, 121
Coastal Marshes: Ecology and Wildlife Management, 165
Coccyzus americanus, p. 4
Common Riparian Plants of California: A Field Guide for the Layman, 163
Community Forestry Manual—Interior Western United States, 158
compacted soils, effects on prairie plants 6
Conservaseed, 78
conservation, Hawaiian forest birds 94
Consumnes River Preserve, p. 6
control of, *Myriophyllum spicatum*; 29.4, 102
control of, *Ampelopsis brevipedunculata* 42
control of, fescue 13.2
control of, *Lythrum salicaria* 139, 140
control of, multiflora rose p. 75
control of, *Hemerocallis fulva* 10
control of, exotic species at Indiana Dunes 143.1
control of, *Rhamnus frangula* 144.4
control of, tamarisk 53
control of, feral pigs 20.1, 54, 141
control of, aspen 13.7
control of, feral goats 54, 141, 144.2
Corte Madera Creek, salt marsh enhancement 116.1
Cottam, Grant 63
Craggy Pinnacle; 131, 146
creation of, vernal pools 106.2, 106.4, 106.5, 106.6
Crescent Bypass Revegetation Project, 148.6
Crex Meadows, p. 25
Daniels and Zipper, p. 79
Denali National Park, restoration of alpine plant communities 126.5
Denver Botanical Garden, 77
Deschampsia cespitosa, ecotype selection 57.2
Desert Trees for Urban Landscapes, 166
Desert Botanical Garden, 126.6

Diamond, Jared 63
diversity, 145
Douglas-fir-ninebark habitat type, 97
Down by the River: The Impact of Federal Water Projects and Policies on Biological Diversity, 111
drip irrigation, p. 6, 7
Drosera intermedia, 24
DuPage County Forest Preserve, 9
Earthwatch grants, 153
Echinodorus spp., 23
ecological restoration as a behavioral shift, 180.3
ecological restoration as art, 180.2
Ecosystem Survival Plan, 155.3
education and, restoration ecology 152, 155.2
education and, wetland and coastal studies 156
Ehrlich, Anne p. 79
Endangered Species Act, a review 58.1, 176
Endangered, Threatened or Protected Native Plants of Texas, 51
Enhancement, Restoration, and Creation of Vernal Pools at Del Sol Open Space and Vernal Pool Reserve, Santa Barbara County, California, 67
Environmental Survey Consulting, 147
Estuarine Research Laboratory, 35
Ewel, John J. 63
exotic plant vandalism, 142
exotic plants in Wisconsin Natural Areas, 144.3
Faron, Don p. 68
Felis rufus, reintroduction to Cumberland Island 124
fescue toxicosis, 55
fire, bison and gophers, roles in grassland ecology 11
Field Guide for Wetland Delineation: Unified Federal Method, 174
Florida scrub community, p. 15
Front-end Tractor Reaper, 75, 147
genetic contamination, p. 21
genetic variations and patterns, p. 19
Gentiana puberula and, mycorrhizae 7
Geographic Information Systems, 107.2
Glen Canyon Environmental Studies, 71
global warming; 66, 91, 120
Gorges Valley, restoration of 112.5
grazing, effect on savanna recovery p. 73
Great Lakes, restoration plans 43
Great Lakes wetlands' diversity, critical factors 117.3, 117.4
Greenhouse Effect, Sea Level Rise, and Coastal Wetlands, 66
Grin Reaper, 147
grouse habitat and grassland management, 82.1, 82.2
Haleakala National Park, restoration of 54
Hamamelis virginiana, response to canopy gaps 96
Handley, Bruce p. 7
Hareuveni, Nogah p. 9
Harper, John 63
Heathland Restoration: A Handbook of Techniques, 79
Helinathemum bicknellii, 3
High Clark Draw, rehabilitation of 56.1
Houston Arboretum, 12
Huffman Prairie, 1
Huntington Beach Wetlands, restoration of 122
hydropseed mixes, evaluation of 148.1

In Defense of Wildlife: Preserving Communities & Corridors, 176
 Index to *Vegetation of Wisconsin*, 49
 Inouye, David W. p. 78
 insect groups, response to prairie burns 85
 interpretive signage and trail use, 146
Inventary of Rare and Endangered Vascular Plants of California, 68
Iris versicolor, 23
 Janzen, Daniel p. 78
 Johnson, Aubrey Stephen 176
 Kentula, Mary 159
 Kern River, p. 4
 Lac La Belle, 102
Lactuca hirsuta, 3
Lake and Reservoir Restoration Guidance Manual, The 167
 Lake Tahoe watershed, restoration of 115
 lake maintenance, 28.1
 lake dredging and phosphorus, 29.2
 Lake Mead fertilization project, 29.3
 land imprinting, 148.3, 149
 landscape ecology, p. 9
Lespedeza spp. as savanna indicators, 72

Lespedeza leptostachya, 14.1
Lillium candidum, p. 11
 liming and acid rain mitigation, 30.2
 liming mine tailings, results of 148.7
Lolium multiflorum, alternatives to 39
 Louada, Svata p. 79
 Louisiana Coastal Vegetation Program, 118.1
Marsh Memos, 161
Martes pennanti, re-establishment of 101
 Mediterranean landscapes, p. 10
 micropropagation of, freshwater plants 132
 micropropagation of, *Atriplex canescens* 138.2
 micropropagation of, native woody plants 133
 micropropagation of, *Ruppia maritima* 134
 micropropagation of, *Atriplex griffithsii* 138.2
 mitigation banking, 107.4
 mitigation, concern over 179.3, 181.1
 mitigation guidebook, 179.1
 monitoring, estuarine wetlands 25.2
 Mott, Gary 142
 mycorrhizal fungi, relation to succession 148.5
NALMS Management Guide for Lakes & Reservoirs; 69, 168
National Wildflower Research Center's Wildflower Handbook, The 171
 native shrubs, performance of on mined lands 127.3
 native vegetation and, visitor-employed photography p. 70
 native vegetation, public perception of p. 69, 180.1
 natural reforestation at Walden pond, argument over p. 65
 Neot Kedumim p. 9
 New York Botanical Garden, 18
 non-game bird grassland habitat, critical factors in 47
 Nonesuch Island, restoration of 21.1

Instructions to Contributors

Contributions to **Restoration & Management Notes** are welcome and will be considered promptly for inclusion in upcoming issues. Notes must deal with the natural history, physiology, and propagation of native plants and animals; techniques for reestablishment and management of ecological communities, including planning, site preparation, species introduction, and control of pest species; general community improvement; human use and impact; and other subjects related to the restoration and management of native communities for scientific, practical or esthetic purposes. Contributions dealing with community composition and ecology will be accepted only when related to management. Material dealing with management for economic purposes—economic forestry, or range management for forage production, for example—will not be accepted unless explicitly related to the restoration of native plant and animal communities of high ecological quality.

Plant and animal communities to be included are those native to North America. These include prairies, deciduous and conifer forests, wetlands, lakes and streams, coastal, and montane communities. Material dealing with these and closely related communities elsewhere will be considered.

The editor welcomes contributions of five kinds:

1. Reports of research, both basic and applied, including notices of research projects getting underway, progress reports of ongoing projects and projects nearing completion, whether results are being published elsewhere or not.

2. Notices of new and continuing restoration and management projects.

3. Questions, problems and suggestions drawing attention to areas in which new information is needed.

4. Notices of meetings, publications (including books), legislation, and other events related to restoration and management.

5. Comments on notices appearing in the journal and on matters pertaining to restoration and management generally.

Contributions must be typed double-spaced on white 8½ X 11" bond paper, and should include a title; the name, title, address, and phone number of contributor(s); text of not more than 250 words, and, if appropriate, one or two references to related work and to reports of the work published elsewhere. Please use a separate sheet for each contribution. Text should in all cases be as short as possible. To facilitate editing, please follow the format for contributions closely. Use of metric units is encouraged, and scientific names should be supplied for all but the most widely known organisms (e.g., big bluestem grass, sugar maple).

Notices of new restoration and management projects are solicited, but when they do not include significant research, should be limited to 150 words identifying the project and describing the site, soils, exposure, existing conditions, and management plans.

Short announcements of relevant articles appearing in other publications are welcome. Please query the editor about ideas for longer articles.

Since this publication will reach readers with a wide variety of backgrounds and interests, the editor encourages use of a plain and straightforward style, free of unnecessary technical terms. Contributions will be edited when necessary for length and clarity. Contributors are asked to submit reprints of papers dealing with the reported work for a permanent file that will be available for use by all subscribers.

A cumulative index of contributors and subjects will be included in the journal at regular intervals.

Recovery of Trampled Bryophyte Communities (Virginia)

Susan M. Studlar, Division of Science and Mathematics, Centre College of Kentucky, Danville, KY 40422 (606) 236-9315

Trampling experiments were conducted in an oak woods on top of Salt Pond Mountain (elevation 1158 m) near Mountain Lake Biological Station. Controlled levels of human trampling simultaneously fragmented and rejuvenated six species of moss. One year after trampling, *Ditrichum pallidum*, *Hypnum imponens*, *Polytrichum commune*, *Sphagnum palustre/henryense*, and *Thuidium delicatulum* showed 80 percent or more recovery from 4200 walks. *S. recurvum* showed 98 and 25 percent recovery from 130 and 1600 walks, respectively. After two years *P. commune* and
