FIRE IN FORESTRY, VOL. I & II

*by Craig Chandler; Phillip Cheney;
Philip Thomas, et al.*

Two Volume Set · 790 pp. - \$110.00
Orig. Ed. 1983, Reprint 1991

VOL I: Forest Fire Behavior and Effects

472 pp. \$72.50

ISBN 0-89464-529-3

A comprehensive reference, this volume discusses the factors which affect the behavior of forest fires, and the effects of fires on forest ecosystems. Complex concepts and mathematics are kept to a minimum in this book, which is thoroughly international in scope. An author index and a subject index are included.

VOL. II: Forest Fire Management and Organization

318 pp. \$49.95

ISBN 0-89464-530-7

This volume deals with the policy and techniques used for controlling forest fires. International in scope, complex concepts and mathematics are kept to a minimum here also. Included are an author index and a subject index.

Also Available!

THE PHILOSOPHY AND PRACTICE OF WILDLIFE MANAGEMENT

by Frederick F. Gilbert & Donald G. Dodds

Orig. Ed. 1987 294 pp. \$29.50

ISBN 0-89874-911-5

Most books on wildlife management tend to stress ecology and wildlife biology, failing to recognize that biopolitics is the true basis of effective management. This book, using examples from Canada, the United States, and developing countries, shows the mechanisms and historical foundations of wildlife management. It also traces the evolution of increasingly sophisticated approaches to the management of our natural fauna. Drawing on the authors' own experiences in North America, Africa, and the Caribbean, the book becomes a personal account of how wildlife management works and why, sometimes, it doesn't.

When ordering, please add \$5.00 for first book, \$1.50 each additional to cover shipping charges.

A REUNION OF TREES

The Discovery of Exotic Plants and Their Introduction into North American and European Landscapes

Stephen A. Spongberg

Prologue by Sam Bass Warner, Jr.

Stephen Spongberg's vividly written and lavishly illustrated "travel story" of trees and shrubs tells of intrepid and extraordinary explorers who journeyed to the far corners of the globe and brought back to Europe and North America a wealth of exotic plant species. It constitutes a veritable history of ornamental trees and shrubs.

8 1/2 x 11, 144 halftones, 29 color illus., 57 line illus., 272 pp., \$35.00 cloth

SUSTAINING THE EARTH

John Young

In this tour de force, John Young assesses the history of the environmental movement and makes a call to arms for an alternative attack on the problems. He maintains that only a powerful synthesis of political, economic, and moral ideologies—a unification he terms *postenvironmentalism*—will move world societies into a relation to the environment that maintains the best democratic values.

"Young expertly traces the many strains of the environmental movement and demonstrates how their best elements might be woven together to create a new and enduring political consensus. His book is a message of hope and common sense."

—Edward O. Wilson

200 pp., \$19.95 cloth

Dynamics of Soil Organic Matter in Tropical Ecosystems

Edited by David C. Coleman, J. Malcolm Oades, and Goro Uehara

More than 50 experts in the field of soil organic matter worked together to produce *Dynamics of Soil Organic Matter in Tropical Ecosystems*. Funding for the project was provided by the National Science Foundation Ecology Program, and top minds in the field of soil organic matter presented their current knowledge on these seven key topics:

- Constituents of Organic Matter in Temperate and Tropical Soils
- Soil Organic Matter as a Source and a Sink of Plant Nutrients
- Interactions of Soil Organic Matter and Variable-Charge Clays
- Biological Processes Regulating Organic Matter Dynamics in Tropical Soils
- Organic Input Management in Tropical Agroecosystems
- Modeling Soil Organic Matter Dynamics in Tropical Soils
- Methodologies for Assessing the Quantity and Quality of Soil Organic Matter

Published for the University of Hawaii, College of Tropical Agriculture and Human Resources, Department of Agronomy and Soil Science
\$30.00, clothbound

To order: Send check or money order, plus \$1.00 for shipping. VISA and MasterCard also accepted (include acct no., exp. date, and signature).

WETLAND CREATION & RESTORATION

The Status of the Science

Edited by Jon A. Kusler and Mary E. Kentula

With more than 30 papers from leading scientists and technicians working in the field, this book is a state-of-the-art report on wetland restoration in the U.S. Based upon important new information, *Wetland Creation and Restoration* provides the first major national assessment by region of the capacity to implement a no-net-loss of wetlands plan. 600 pages • \$39.95 (paper) • \$60.00 (cloth)

WILDLIFE & HABITATS IN MANAGED LANDSCAPES

Edited by Jon E. Rodiek and Eric G. Bolen

Increasing land development in rural areas is having a disruptive impact, leading to a continuous decline in wildlife and wildlife habitats. *Wildlife and Habitats in Managed Landscapes* presents a new strategy for meeting this problem by applying, for the first time, the tools of planning, management and design to entire landscapes to meet the needs of both wildlife and humans.

250 pages • \$24.95 (paper) • \$45.00 (cloth)

ENVIRONMENTAL RESTORATION

Science and Strategies for Restoring the Earth Edited by John J. Berger

Environmental Restoration is the result of the UCal at Berkeley's ground-breaking conference on ecological restoration. For the first time, the nation's restoration experts met to consider the restoration of all major natural resource systems and the planning of environmentally suitable urban areas.

400 pages • \$19.95 (paper) • \$34.95 (cloth)

Please include \$3.00 for shipping and handling 1st book; and \$1.00 each additional. CA and DC Residents add 6% tax. (Dealer inquiries invited)

Revegetation Information Monitoring and Analysis Software

for reclamation managers
 environmental coordinators
 and those concerned with monitoring vegetation

RIMA is a comprehensive vegetation data base management and analysis system for storage, retrieval, summarization, graphic portrayal, and reporting of data from reclaimed and native lands. The software is easy to use and runs on a microcomputer with an MSDOS operating system.

RIMA dramatically reduces time expenditures, organizes and stores data and helps you stay on top of vegetation trends.

Cover - Point

Optical Point Projection Device

for use in point-intercept cover sampling

Uses

- o Monitoring of restored areas
- o Assessment of cover performance standards
- o Baseline studies
- o Erosion control modeling studies

Technical features

- o High-resolution optics including microscope reticle (crosshairs)
- o Very low parallax (stable point projection)
- o Downward or upward projection, allowing equitable treatment of overstory and understory strata plants (Model 3)
- o Ten-points spaced along a one-meter bar (downward projection only, Model 4)
- o Lightweight, rugged construction
- o Mounts on standard photographic tripods
