# Cover - Point

## Optical Point Projection Device

*for use in point-intercept cover sampling*

View through eyepiece  
(Reticle finer than shown)

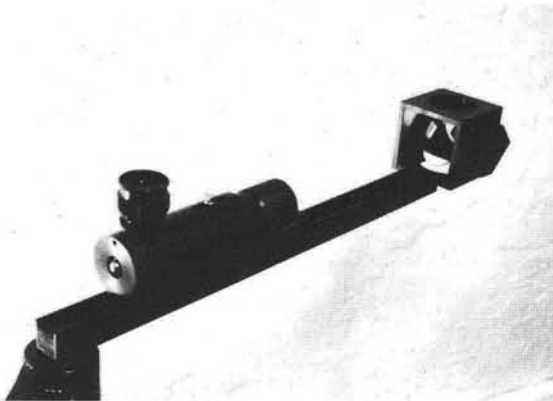

### Uses

- o Monitoring of restored areas
- o Assessment of cover performance standards
- o Baseline studies
- o Erosion control modeling studies

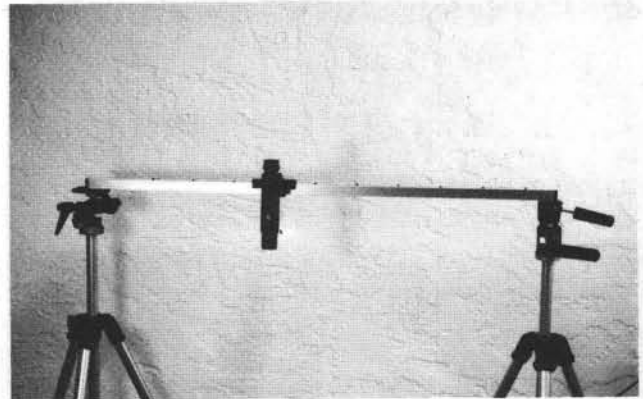

### Technical features

- o High-resolution optics including microscope reticle (crosshairs)
- o Very low parallax (stable point projection)
- o Downward or upward projection, allowing equitable treatment of overstory and understory strata plants (Model 3)
- o Ten-points spaced along a one-meter bar (downward projection only, Model 4)
- o Lightweight, rugged construction
- o Mounts on standard photographic tripods

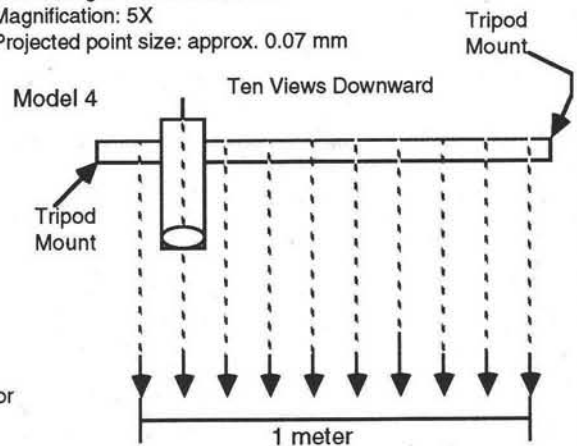

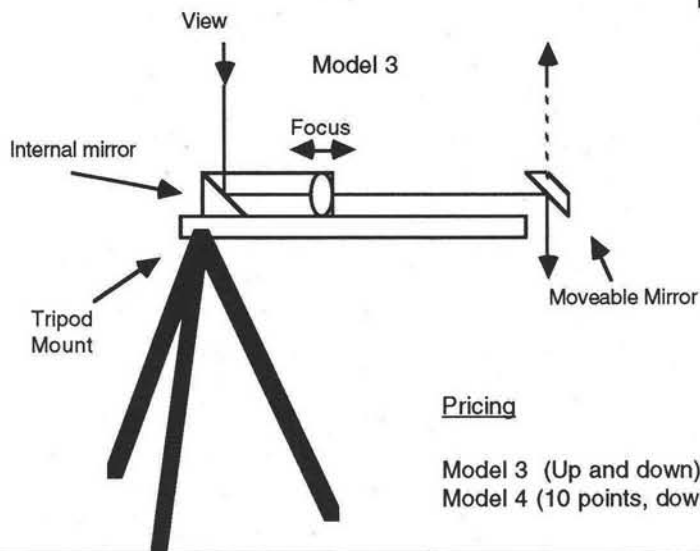

### Model 3 - Specifications

Length: 55.4 cm  
Weight: 701 gm (1.6 lb)  
Focus range: 18 cm to infinity  
Magnification: 5X  
Projected point size: approx. 0.07 mm

### Model 4 - Specifications

Length: 118 cm  
Weight: 899 gm (2.0 lb)  
Focus range: 40 cm to 200 cm  
Magnification: 5X  
Projected point size: approx. 0.07 mm

### Pricing

Model 3 (Up and down).....\$845  
Model 4 (10 points, down only)....\$875

## **EXPERIENCE YOU CAN COUNT ON.**

Some people believe that enhancing or restoring natural resources is a new idea, but it isn't new to us. Working with existing technologies and a few we've developed ourselves, we've been creating natural environments for over a decade.

Inter-Fluve has literally built, restored or enhanced hundreds of miles of streams and rivers, and acres of ponds, lakes and wetlands. From design and engineering to on-site construction supervision, we get the job done.

**WILLAMETTE PRAIRIE SEED  
PACIFIC NORTHWEST NATIVE GRASS SEED**

Native grasses are both beautiful and drought resistant and require little fertilization. They are suitable for planting in a wide variety of settings from small urban gardens to large environmental restoration projects.

**CURRENTLY AVAILABLE BUNCHGRASS SEED FALL 1991:**

***Deschampsia caespitosa* — Tufted Hair Grass**

This beautiful bunch grass is highly recommended for seeding on wet, cool sites. It is an ideal choice for wetland and wet prairie creation and restoration projects.

Seeding Rate: 1 1/2 lb – 2 lb per acre

***Beckmannia syzigachne* — American Slough Grass**

This wetland pioneer bunchgrass is an annual and is often stoloniferous. Seed it with emergents in marshes and on edges of a pond, or plant it in patches with *Deschampsia* in a wet prairie.

Seedling rate: 5 lb – 10 lb per acre

**AVAILABLE FALL 1992:**

***Elymus glauca* — Blue Wildrye**

***Festuca occidentalis* — Western Fescue**

***Glyceria* sps — Western Manna Grasses**

All Willamette Prairie Seed is grown in Oregon's Willamette Valley. We offer custom native grass seed collection and propagation. Call or write to Paul Fishman or Mark Wilson for additional information and consulting services.

## THE PHILOSOPHY AND PRACTICE OF WILDLIFE MANAGEMENT

by Frederick F. Gilbert & Donald G. Dodds

2nd Ed. 1992 326 pp. \$34.50

ISBN 0-89464-438-6

A wildlife manager is a spokesperson for wildlife, a custodian of a variety of public interests, and a key element in the decision-making process regarding land use. This demanding role requires basic knowledge of wildlife species and their biological requirements, and a skill in people management. This book should provide sufficient insight into the appropriate mechanisms for achieving these aims. An exposure to such subject areas as animal physiology, ecology, wildlife nutrition, and wildlife biology, is assumed, and the writers concentrate on the historical bases for, and modern influences on, wildlife policy and management.

### PREFACE

- I **THEN AND NOW**--Wildlife Management, Jurisdictional Responsibilities, Legislation and Administration
- II **MAN AND WILDLIFE**--Culture, Conflicts, and Values
- III **THE BIOLOGICAL BASES FOR MANAGEMENT**
- IV **MANAGEMENT SYSTEMS**
- V **HABITAT MANAGEMENT**

- VI **SPECIES MANAGEMENT**
- VII **SOME SPECIALIZED AREAS OF MANAGEMENT**
- VIII **ENDANGERED SPECIES**-- Some Management Strategies
- IX **ENVIRONMENTAL IMPACT ASSESSMENT:** The New Dimension
- X **WILDLIFE INTERNATIONAL**--Aid Policies, Problems, and Management
- XI **WILDLIFE 1991-2000**--The Profession and Management

# Prairies, Forests, and Wetlands

*The Restoration of Natural Landscape Communities in Iowa*

BY JANETTE R. THOMPSON

"In addition to being a thorough guide to restoration of prairies, forests, and wetlands, Jan Thompson's book is an excellent introduction to the natural history of the three communities. . . . A welcome addition to the repertoire of information available to restorationists."—Paul Christiansen

"... a real jewel . . . combines a most readable background on Iowa's natural landscape, how the various ecoregions evolved the way they did, and, most importantly, practical approaches to bringing a small amount of this landscape back in a way that we can enjoy them."—Dennis R. Keeney, Director, Leopold Center for Sustainable Agriculture  
168 pp., 33 photographs, 5 drawings and maps, \$24.95 cloth, \$10.95 paper

*Also from Iowa*

## Fragile Giants

*A Natural History of the Loess Hills*

## Revegetation Information Monitoring and Analysis Software

for reclamation managers  
environmental coordinators  
and those concerned with  
monitoring vegetation

RIMA is a comprehensive vegetation data base management and analysis system for storage, retrieval, summarization, graphic portrayal, and reporting of data from reclaimed and native lands. The software is easy to use and runs on a microcomputer with an MSDOS operating system.

**RIMA dramatically reduces time expenditures, organizes and stores data and helps you stay on top of vegetation trends.**

## **The River of the Mother of God And Other Essays**

**Edited by Susan L. Flader and J. Baird Callicott**

"A fascinating intellectual history. . . . Includes a helpful chronology of Leopold's life and a fine introduction written by the editors."

—**Bill McKibben,**

*New York Times Book Review*

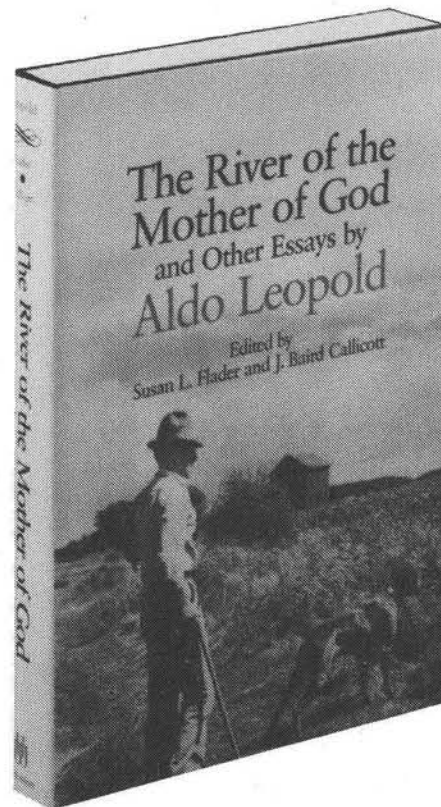

"*The River of the Mother of God* is a superb collection of essays that allows the reader insight into Leopold's thought processes, his sense of humor, his compassion, and his pithy prose. . . . This book demands a place on the bookshelves of conservationists, environmentalists, historians, wildlife biologists, and the thousands of employees of state and federal agencies whose job it is to care for America's natural resources. . . . Susan L. Flader, J. Baird Callicott, and the University of Wisconsin Press should be commended for this indispensable collection that shows Aldo Leopold's unique literary legacy and his power to distill into a few words major ideas about the interdependency of humans, plants, and animals."

—**Andrew Gulliford,**

# GREAT PLAINS RESEARCH

## A JOURNAL OF NATURAL AND SOCIAL SCIENCES

*Great Plains Research*, a biannual multidisciplinary international journal, publishes original scholarly papers in the natural and social sciences dealing with issues of the Plains environment. We invite submissions of manuscripts from regional scholars. Papers should report original findings, and be written to be both a contribution to the author's discipline and of interest to a multidisciplinary audience. Prospective authors should write to the Editor for information about style and submission procedures.

PUBLISHER: Center for Great Plains Studies, University of Nebraska

ABSTRACTED/INDEXED IN: *Historical Abstracts*; *America: History and Life*; and *Meteorological and Geostrophysical Abstracts*.

EDITOR: Clare V. McKanna, Jr., University of Nebraska-Lincoln

ASSOCIATE EDITORS: Elizabeth Grobsmith, Anthropology, UNL; Kathleen Keeler, Biological Sciences, UNL; David Lewis, Agronomy, UNL; Lynn White, Sociology, UNL

SUBSCRIPTION RATES PER YEAR: United States Individual \$25.00, Institutional \$50.00; Canada Individual \$28.00, Institutional \$53.00; Other Foreign Individual \$35.00, Institutional \$60.00. Submit check or money order in U.S. currency rate to *Great Plains Research*
