Assistant Professor

Conservation Biologist/Environmental Life Scientist

The Department of Environmental Studies and Planning at Sonoma State University is seeking a tenure-track Assistant Professor with an earned doctorate or A.B.D. and anticipating completion of the Ph.D. by no later than August 20, 2000, in the life sciences, natural resources management, applied conservation biology, ecology, or landscape architecture, or related field to teach undergraduate courses such as Conservation Biology, Environmental Restoration and/or Environmental Geographic Information Applications. Ideally the candidate would be willing to work with campus and community groups in activities related to environmental restoration and conservation biology. Applications must be post-marked by either 1/8/99 (for fullest consideration) or 2/19/99. Please request announcement #A013-99/00 from **Professor James C. Stewart, Chair, Department of Environmental Studies and Planning, Sonoma State University, 1801 E. Cotati Ave., Rohnert Park, California 94928-3609**, (707) 664-2306, by e-mail ensp@sonoma.edu or access it at: www.sonoma.edu/ensp/lifescifac.html Sonoma State University is an Affirmative Action/Equal Opportunity Employer.

PHC RECLAMATION, INC.

Back to Nature

A NATURAL SYSTEMS APPROACH

COMPANY OVERVIEW:

PHC Reclamation, Inc. (PHC-REC) was established in 1997 to provide cost-effective, biologically based solutions for land reclamation and restoration projects. The company's founders are leaders in the use of mycorrhizal fungi for the establishment of trees, shrubs, forbs and grasses on lands that have been disturbed by mining, construction and other activities. PHC-REC is a sister company to Plant Health Care, Inc., Pennsylvania, the world technology leader in the commercial production of endo- and ectomycorrhizal fungal inoculant products.

THE PHC-REC EXPERTS:

Donald H. Marx, Ph.D. • The winner of the prestigious Marcus Wallenberg Prize in Forestry; for over 30 years, he has pioneered the use of specific mycorrhizae, organic soil amendments and natural soil processes to successfully revegetate minelands and other highly degraded sites.

Charles E. Cordell, Ph.D. • Has over 25 years of experience as the lead scientist in the technology transfer and operational production of plants with specific mycorrhizae in nurseries for reforestation, mineland reclamation and other land uses.

Len Marrs • Has over 25 years of extensive hands-on experience in the arid Western U.S. on the engineering of soil and water resources. His expertise is now integrated with PHC microbial technologies for the reclamation and revegetation of minelands and other disturbed sites.

TECHNICAL SUPPORT:

PHC-REC scientists and technical experts work directly with customers to help design and implement turn-key solutions for difficult land restoration projects, including large-scale mineland reclamation, habitat restoration and reforestation of degraded sites.

PRIMARY SERVICES:

PHC-REC applies technical expertise, emerging techniques and practices, and its own high quality products to tough revegetation and renewal projects, including:

- Grass and shrub revegetation of severely disturbed lands using exclusive pelletized VAM technology; pellets of Mycor™ VAM Cocktail™ endomycorrhizal fungal inoculum and municipal biosolids accelerate the establishment of vegetation on even the toughest of soils and climates.
- Reforestation of poor and distressed soils using endo- and ectomycorrhizal fungal inoculated tree seedlings, including PHC-REC's own MycorTree™ seedlings.
- Bioremediation and phytoremediation of contaminated soils, such as industrial wastes, brown fields, landfills, etc., using fungal and bacterial technologies with specific plant species.

The Humboldt Field Research Institute Announces a new Professional-level Seminar Series and Certificate Program . . .

Eagle Hill Seminars in Ecological Restoration

Professional-level seminars will be held at locations across the United States and Canada and at other locations upon request. A full range of ecological restoration seminars (1-5 days) will be provided to aid and support the restoration practitioner involved in the repair of aquatic and terrestrial ecosystems as well as stream and riparian ecosystems. Both introductory and advanced seminars will be offered. Seminars may be taken individually or as a series in order to earn a Certificate in Restoration Ecology.

Seminars, 1999

Applied Ecological Restoration: Introduction and Overview

Bioengineering for Ecological Restoration Projects

Salvage of Plant Communities (Large and Small Scale)

Ecological Restoration: Special Problems and Projects (Master Class)

Bioengineering with Coir Fiber Materials

Stream and Riparian Restoration

Forest Restoration

Preparing and Using a Restoration Model

Ecological Restoration in Parklands

Locations, 1999

Eagle Hill, Maine

Boston, Massachusetts

Washington, DC

Philadelphia, Pennsylvania

Dayton, Ohio

St. Louis, Missouri

Chicago, Illinois

Toronto, Ontario

A DETAILED FLYER IS AVAILABLE . . .

Otter Creek Wetland Mitigation Bank

AES provided pioneering ecological services for the first private wetland bank in the U.S.

Solid Science

For over 20 years, our ecologists have applied solid science to the restoration of thousands of acres of native prairie, wetland, savanna and woodland systems.

If you're looking for successful, sustainable natural solutions, we invite your inquiry.

Expertise

- ✱ Wetlands delineation, mitigation, permitting and monitoring
- ✱ Prairie restoration, design and installation
- ✱ Conservation development, land use planning
- ✱ Fisheries, bird and wildlife studies
- ✱ Largest prairie nursery in U.S.
- ✱ Natural areas management
- ✱ Ecological research and environmental impact studies
- ✱ Landfill/mine reclamation
- ✱ Streambank stabilization
- ✱ Hydrologic studies
- ✱ Expert witness, legal discovery

Cover-Point

Optical Point Projection Device

for use in point-intercept cover sampling

Uses

- o Monitoring of restored areas
 - o Assessment of cover performance standards
 - o Baseline studies
 - o Erosion control modeling studies
- Rugged construction of primarily anodized aluminum

Technical Features

- o High resolution optics including microscope reticle (crosshairs)
- o Very low parallax (stable point projection)
- o Downward or upward projection, allowing equitable treatment of overstory and understory strata plants (Model 5)
- o Ten (or any number) points along one-meter bar (Model 4)
- o Lightweight, rugged construction
- o Mounts on standard photographic tripods

Model 4 - Specifications

- Length: 118 cm
- Weight: 899 gm (2.0 lb)
- Focus range: (40 cm to 200 cm)
- Magnification: 5X
- Projected point size: approx. 0.07 mm

Pricing

- Model 4 (multiple points, down only)..... \$985
- Model 5 (up and down)..... \$1295
- Tripods, heads, carrying cases.....call

Model 5 - Specifications

- Length: 55 cm
- Weight: 630 gm (1.4 lb)
- Focus range: Zero cm to infinity
- Magnification: 5X
- Projected point size: approx. 0.07 mm

Wildlife-Habitat Relationships

Concepts & Applications
Second Edition

Michael L. Morrison, Bruce G. Marcot, R. William Mannan

This successful textbook provides a broad but advanced understanding of habitat relationships applicable to all terrestrial species.

"Looks critically at the intellectual tools and models that are the stock-in-trade of wildlife biologists and forest managers.... A masterful job."

—Peter H. Klopfer, *Bioscience*

Hardcover \$34.95

Birds of Wisconsin

Revised Edition

Owen J. Gromme

With an Introduction by Samuel D. Robbins, Jr.

Gromme's classic comes to life again in a splendid new edition with completely rephotographed color plates and a new introduction by well-known ornithologist Samuel D. Robbins, Jr. This stunning revised edition features eighty-nine full-color portraits depicting the state's rich variety of native species and seventeen new paintings showing birds in their natural habitat.

THE ONCE AND FUTURE FOREST

A Guide to Forest Restoration Strategies

Leslie Jones Sauer, Foreword by Ian McHarg

Andropogon Associates

Presents a comprehensive approach to assessing sites, detailed guidelines for determining management goals, and a thorough overview of appropriate management and restoration techniques. Describes methods to recreate a whole landscape fabric.

350 pages • illustrations, photos, species lists, index • 1997

Cloth: \$50.00 ISBN: 1-55963-552-5

Paper: \$30.00 ISBN: 1-55963-553-3

RESTORING STREAMS IN CITIES

A Guide for Planners, Policymakers, and Citizens

Ann L. Riley

Presents a logical sequence of land-use planning, site design, and watershed restoration measures along with stream channel modifications and floodproofing strategies. Considers the stream as a feature in the urban environment.

450 pages • illustrations, photos, appendixes, index • 1998

Cloth: \$55.00 ISBN: 1-55963-043-4

wilderness BY DESIGN

Ethan Carr

Contemporary environmental historians have suggested that the history of National Park Service management of national parks since 1916 has resulted in a debacle of overuse and ecosystem destruction. Ethan Carr goes beyond polemics to examine specific national park policies and the historical contexts that shaped them.

ZENTNER  ZENTNER

Land Planning and Restoration

Success of environmental restoration projects is measured by their performance over time. That success is a direct reflection of the skill of the restoration team—and its ability to solve complex ecological and regulatory issues.

Over the last decade, Zentner and Zentner has managed over 500 restoration projects. The experience of success just feels good to us.

Our services include:

- Wetland Delineations
- Restoration and Mitigation Planning
- Biological Assessments
- Endangered Species: Section 7 and 2081 Approvals
- Regulatory Planning and Permitting
- Construction and Post Construction Monitoring

Contact us at one of our California offices.

Great Plains Research

A JOURNAL OF NATURAL AND SOCIAL SCIENCES

Great Plains Research, a biannual multidisciplinary international journal, publishes original scholarly papers in the natural and social sciences dealing with important issues of the Plains environment. It includes articles from symposia, information on upcoming conferences, and reviews of books addressing topics pertaining to the Great Plains.

ABSTRACTED/INDEXED IN: *America: History and Life, Cambridge Scientific Abstracts, Historical Abstracts, Geo Abstracts and GEOBASE, Meteorological and Geostrophysical Abstracts, and Sociological Abstracts, Inc.*

PUBLISHER: Center for Great Plains Studies, University of Nebraska

ISSN: 1052-5165

We invite manuscripts from regional scholars reporting original data in scientific or social scientific approaches, and of interest to a diverse audience. Interested scholars please contact the editor for information about style and submission procedures.

SUBSCRIPTION RATES PER VOLUME YEAR:

- | | |
|----------------------------------|-------------------------------------|
| U.S. Individual \$25.00 | U.S. Institutional \$50.00 |
| Canada Individual \$28.00 | Canada Institutional \$53.00 |
| Other Foreign Individual \$35.00 | Other Foreign Institutional \$60.00 |

Submit check or money order in U.S. currency to *Great Plains Research*.

For a free issue and/or a back issue list:
