*Ecological Restoration* is published quarterly by the University of Wisconsin Press. © by the Board of Regents of the University of Wisconsin System. No part of this publication may be reproduced without the written consent of the Editor. Requests for reprints of an article or illustration should be made directly to the Journal Division, UW Press.

Contributions are welcome and should be sent the Editor, UW Arboretum, 1207 Seminole Highway, Madison, WI 53711 (608) 262-9591, e-mail: [ecorest@mhub.facstaff.wisc.edu](mailto:ecorest@mhub.facstaff.wisc.edu). Instructions to contributors are printed at the back of each issue.

Authorization to photocopy items for personal use, or the internal or personal use of specific clients, is granted by the Board of Regents of the University of Wisconsin System for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$1.50 per copy is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. *Ecological Restoration* is indexed in AGRICOLA.

*Ecological Restoration* serves the Society for Ecological Restoration, an international organization of restorationists. They can be contacted at P.O. Box 41626, Tucson, AZ 85717-1626, phone (520) 626-7201.

**Postmaster:** Send address changes to *Ecological Restoration*, Journal Division, 2537 Daniels St., Madison, WI 53718.

**Subscriptions:** \$27 individuals (please pre-pay); \$73 institutions. Foreign subscribers please add \$8; \$11 if air-mail delivery is desired. All correspondence regarding subscriptions, advertising, and related matters should be sent to: Journal Division, 2537 Daniels St., Madison, WI 53718, U.S.A.

Members of the Society for Ecological Restoration receive *Ecological Restoration* as a privilege of membership. Membership rates are \$57 (individual); \$39 (student); \$99 (business); and \$103 (library/government).

**Advertising:** Call (608) 224-3884 for current rates.

**Note:** The editors of *Ecological Restoration* would like to alert readers that while many of our nursery advertisers sell only seeds and plants native to their region, some others may sell non-native species or native species from outside their region. While we try to be selective about our advertisers and want to promote the use of local native plants, we cannot guarantee the authenticity of propagules from any nursery. Therefore, we recommend that you talk with nursery operators if you have any questions about the source of seeds or plants for your restoration project. Similarly, references to products by brandname or trademark does not imply an endorsement by the editors or publishers of this journal.

**Cover Photo:** Remnant soil, protected from erosion by a vegetation made up mostly of exotics, rises above researchers visiting a trial revegetation site on the Island of Kaho'olawe, Hawai'i. Extensive erosion following disruption of vegetation due to the introduction of goats and ranching around 1800 has stripped soil down to hardpan on large areas of the island, providing a challenge for restorationists. For an account of a follow-up study of a former reintroduction study involving trials with 34 native species, see the article by Alan D. Ziegler and his colleagues beginning on page 26.
