Inzai-machi, Chiba-Ken, Japan

## Can we not do more than cut and trim the forest? —can we not assist in its interior economy, in the circulation of the sap?

Henry David Thoreau  
“Paradise (to Be) Regained”

**Editor:** David Egan

**Editorial Assistant:** Mary Ann Pels

**Proofreader:** Julie Hayward

**Arboretum Director:** Gregory D. Armstrong

**Chair, Society of Ecological Restoration:** Elizabeth Read

**Graphic Arts:** Kevin Ducey

*Ecological Restoration* is published quarterly by the University of Wisconsin Press. © by the Board of Regents of the University of Wisconsin System. No part of this publication may be reproduced without the written consent of the Editor. Requests for reprints of an article or illustration should be made directly to the Journal Division, UW Press.

Contributions are welcome and should be sent the Editor, UW Arboretum, 1207 Seminole Highway, Madison, WI 53711 (608) 262-9591, e-mail: [ecorest@mhub.facstaff.wisc.edu](mailto:ecorest@mhub.facstaff.wisc.edu). Instructions to contributors are printed at the back of each issue.

Authorization to photocopy items for personal use, or the internal or personal use of specific clients, is granted by the Board of Regents of the University of Wisconsin System for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$1.50 per copy is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. *Ecological Restoration* is indexed in AGRICOLA. The *Ecological Restoration* Website is: <http://sites.netscape.net/ecorestoration/homepage>.

*Ecological Restoration* serves the Society for Ecological Restoration, an international organization of restorationists. They can be contacted at 1955 W. Grant Road #150, Tucson, AZ 85745, U.S.A., phone (520) 622-5485, fax (520) 622-5491, e-mail: [info@ser.org](mailto:info@ser.org).

**Advertising:** Call (608) 224-3884 for current rates.

**Note:** The editors of *Ecological Restoration* would like to alert readers that while many of our nursery advertisers sell only seeds and plants native to their region, others may sell non-native species or native species from outside their region. While we try to be selective about our advertisers and want to promote the use of local native plants, we cannot guarantee the authenticity of propagules from any nursery. Therefore, we recommend that you talk with nursery operators if you have any questions about the source of seeds or plants for your restoration project. Similarly, references to products by brandname or trademark does not imply an endorsement by the editors or publishers of this journal.

**Cover Photo:** A volunteer gathers seed of big bluestem grass for a restoration project in Wisconsin. Long regarded exclusively as a way of patching up damaged landscapes, restoration has recently begun to gain attention as an experience and a way of participating in the ecology of classic landscapes, such as prairies. In the past few years a number of social scientists have begun to turn their attention to this experience, asking why people seek it out, and how they benefit from it. An account of one such study, an investigation of why people volunteer to participate in restoration projects in the Chicago area carried out by Irene Miles and her colleagues at the University of Illinois, begins on page 218.
