Lake Huron rolls, Superior sings
In the ruins of her ice water mansion
Old Michigan steams like a young man's dreams,
The islands and bays are for sportsmen.
And farther below Lake Ontario
Takes in what Lake Erie can send her
And the iron boats go as the mariners all know
With the gales of November remembered.

Note: The editors of *Ecological Restoration* would like to alert readers that while many of our nursery advertisers sell only seeds and plants native to their region, others may sell non-native species or species from outside their region. While we try to be selective about our advertisers and want to promote the use of local native plants, we cannot guarantee the authenticity of propagules from any nursery. Therefore, we recommend that you talk with nursery operators if you have any questions about the source of seeds or plants for your restoration project. Similarly, references to products by brandname or trademark does not imply an endorsement by the editors or publishers of this journal.

Cover Photo: Along the shores of Gitche Gumee. A moonlit summer evening along Lake Superior, Chequamegon Bay in northern Wisconsin, is but one example of the beauty and biodiversity found throughout the Great Lakes. As Karen Rodriguez and Ronald Reid point out in their story about Great Lakes Biodiversity Investment Areas (p. 135), these shorelines need protection and restoration to care for the region's plant and animal communities, and to help maintain cultural activities such as commercial and sport fishing, wild rice gathering, and responsible tourism. *Photo courtesy of Karen Rodriguez*
