Native Plants Journal

Edited by R. Kasten Dumroese

ISSN: 1522-8339, e-ISSN: 1548-4785, 3/year

Native Plants Journal is a forum for dispersing practical information about planting and growing North American (Canada, Mexico, and U.S.) native plants for conservation, restoration, reforestation, landscaping, highway corridors, and related uses. Topics include seed germination, planting techniques and tools, equipment, cultural techniques, production trends, seed collection, genetics, and fertilization. The second issue of each year includes the Native Plants Materials Directory, which provides information about producers of native plant materials in the U.S. and Canada. Relevant books are reviewed. Subscribers receive online access to all back issues. Volumes one through five are open access and available to all. Please visit npj.uwpress.org for more information.

Native Plants Journal began in January 2000 as a cooperative effort of the USDA Forest Service and the University of Idaho, with assistance from the USDA Agricultural Research Service and the Natural Resources Conservation Service.

ZENTNER  ZENTNER

Land Planning and Restoration

Success of environmental restoration projects is measured by their performance over time. That success is a direct reflection of the skill of the restoration team—and its ability to solve complex ecological and regulatory issues.

Over the last decade, Zentner and Zentner has managed over 500 restoration projects.

Our services include:

- **Wetland Delineations**
- **Restoration and Mitigation Planning**
- **Biological Assessments**
- **Endangered Species: Section 7 and 2081 Approvals**
- **Regulatory Planning and Permitting**
- **Construction and Post Construction Monitoring**
