

Ecological Restoration

Volume 33 ▪ Number 3 | September 2015

Seed Production Environment on the Restoration Success of Two Perennial Grass Species

EDITORIAL

Not So Novel Ecosystems

Steven N. Handel

RESTORATION NOTES

Germination of Native Species: Efforts to Guide Revegetation in a Mexican Petunia-Invaded Floodplain in Florida

Adrienne M. Smith, Sandra B. Wilson, Carrie Reinhardt Adams and Christine Wiese

Herbicide and Weed Control in a Freshwater Seed Production Field of Smooth Cordgrass (*Spartina alterniflora*)

Ida Wenefrida, Herry S. Utomo and Eric P. Webster

ARTICLES

Can Non-Native Species Explain Patterns of Convergence and Deviation in Regenerating Coastal Dune Forest?

Matthew Grainger and Rudi van Aarde

Effects of Oak-hickory Woodland Restoration Treatments on Native Groundcover Vegetation and the Invasive Grass, *Microstegium vimineum*

J. Stephen Brewer, Matthew J. Abbott and Sean A. Moyer

Fire Effects on Plant Biodiversity Across Multiple Sites in California Vernal Pool Grasslands

Jaymee Marty

Long-term Herbivore Exclusion for Recovery of Buckbrush (*Ceanothus fendleri*) Populations During Restoration of Ponderosa Pine Forests in Northern Arizona

David W. Huffman, Judith D. Springer and W. Walker Chancellor

The Role of Competition and Seed Production Environment on the Success of Two Perennial Grass Species in a Roadside Restoration

Erin Espeland and Laurie Richardson

Ploidy Levels for Some Remnant Eastern Big Bluestem (*Andropogon gerardii*) Populations: Implications for their Conservation and Restoration

Robert D. Tompkins, Christine A. McAllister and Sean Bloom

Responses of Narrowleaf Cattail (*Typha angustifolia*) to Combinations of Salinity and Nutrient Additions: Implications for Coastal Marsh Restoration

Stephen M. Smith, Adam R. Thime, Brian Zilla and Krista Lee

Evaluation of a Fine Sediment Removal Tool in Spring-fed and Snowmelt Driven Streams

Adam J. Sepulveda, Megan Layhee, Zachary A. Sutphin and Juddson D. Sechrist

Community Involvement to Address a Long-standing Invasive Species Problem: Aspects of Civic Ecology in Practice

Rebecca W. Dolan, Kelly A. Harris and Mark Adler

Ecological Restoration (ISSN 1522-4740, E-ISSN 1543-4079) is published quarterly by the University of Wisconsin Press, 1930 Monroe Street, 3rd Floor, Madison, WI 53711-2059. Periodicals postage paid at Madison WI and at additional mailing offices.

Subscriptions: Individual (please pre-pay), \$70 print and electronic, \$60 electronic only; \$45 students; \$160 businesses and nongovernmental organizations; libraries and government agencies, \$270 print and electronic, \$238 electronic only. Non-U.S. subscribers please add \$35 for foreign shipping. All correspondence regarding subscriptions, advertising, and related matters should be sent to Journals Division, 1930 Monroe Street, 3rd Floor, Madison, WI 53711-2059, USA; uwpress.wisc.edu/journals. Members of the Society for Ecological Restoration receive *Ecological Restoration* at a discounted rate.

Please visit our Web site at uwpress.wisc.edu/journals for more information.

POSTMASTER: Send address changes to *Ecological Restoration*, 1930 Monroe Street, 3rd Floor, Madison, WI 53711-2059.

Submissions

We welcome submissions to *Ecological Restoration* from any part of the world. Submissions should relate to the restoration of plants, animals, ecological communities, or landscapes. We understand ecological restoration to be a multidisciplinary and diverse effort and welcome manuscripts considering ecological, and social aspects of restoration, as well as political, economic, legal, and regulatory issues, and other subjects related to ecological restoration. Relevant topics also include techniques and tools for planning, site preparation, species introduction, undesired species control, and monitoring. Manuscripts dealing with plant or animal community composition or general ecology must relate the work explicitly to ecological restoration practice and theory. Similarly, material dealing with reclamation or rehabilitation in a broader sense, or with restoration for economic purposes—economic forestry, range management, waste disposal—must be connected to ecological restoration.

Material may be submitted for the following categories (listed as they are encountered in the journal):

1. Letters to the Editor
2. Observations/Editorials/Commentary/Policy Reports
3. Restoration Notes (shorter items describing project updates, new collaborations, events, innovative technologies, preliminary or unusual findings, thought-provoking concepts, imaginative solutions, etc.)
4. Full-length feature articles on ecological restoration theory, practice, and research (case studies, research reports, photo essays, experiments, etc.)
5. Book, journal, web, or movie reviews

Authors of full-length articles or reviews should submit their material online at er.msubmit.net. Manuscripts must be submitted with a cover letter stating that the material has not been previously published, and has not been submitted elsewhere and will not be until a final decision has been reached by the editor. Questions about the online submission site, or general inquiries may be emailed to ERjournal@aesop.rutgers.edu.

Review and Editing Process

Manuscripts are reviewed externally by experts in the field. The process requires approximately four to six months. Restoration Notes are reviewed and edited in-house unless additional expertise is required to evaluate the submission.

Style

Practitioners of ecological restoration are both a core audience and source of contributions to *ER*. Contributors should use a straightforward style free of unnecessary technical terms and jargon. We prefer the active voice (for example, “We measured three trees” instead of “Three trees were measured”). Please see our Submission Guidelines at er.uwpress.org for more information.

Tables, Photos, and Illustrations

Table and Figure captions should include useful and detailed information, and should be independent of the text. Figures will be reproduced in black and white in the print version of *Ecological Restoration* (usually requiring higher contrast) and can be reproduced in color in the online version. We use color photos on the front and back covers of the journal and welcome submissions of eye-catching, informative, high-quality photographs.

Page Charges

Payment of \$50 per page is requested from authors with research grant or other institutional funds available to underwrite publication costs. Invoices will be sent after composition of pages. Authors with no grant or institutional funds do not need to pay publication costs. Ability to pay page charges is not a condition for acceptance of a manuscript.
