RESTORATION NOTES
Durability and Longevity of *Tympanuchus pallidicinctus* (Lesser Prairie-Chicken) Fence Tags in Kansas and Colorado
Elisabeth C. Teige, Nicholas J. Parker, Megan P. Vhay and David A. Haukos

Variability in Sagebrush Cover due to Method of Determination and its Implications for Habitat Restoration
Autumn D. Watkinson, M. Anne Naeth and Shelley D. Pruss

Using Online Surveys and Landscape Preferences to Enhance Nearshore Restoration
David J. Trimbach

The Rise of Non-Native Invasive Plants in Wooded Natural Areas in Southwestern Ohio
Denis G. Conover and Robert D. Bergstein

Use of a Restored Prairie/Wetland Complex in Ohio by *Thamnophis sirtalis* (Eastern Garter Snake) and Small Mammals During the First Five Years
Wesley O. Smith, Jack R. Marchetti, Daniel R. Timmins, Francis P. Biagioli, Alexandra W. Hogan, Olivia Grandbois and Geoffrey R. Smith

DESIGN APPROACHES TO ECOLOGICAL RESTORATION
Designing for Insects and People: Let’s Face the Music and Dance
Steven N. Handel, Editor

Fostering Insect-Human Relationships through Design
Gena Wirth

Restitching the Suburban Fringe
Jingyi Liu and Ziting Wang

Commentary—Fireflies as Gateway Bugs to Restitch the Suburban Fringe
Sara Lewis

A Matter of Life and Decay: Promoting Insect Habitat in Cemeteries through Use of Deadwood Pavilions
Timothy Tamulonis

Commentary—Deadwood in a Cemetery: Designing to Resurrect Members of the Insect World
Steven N. Handel

The Death and Life of Ash: Landscape Tactics to Adapt to Invasive Species
Sijia Zhong

Commentary—Conserving Forest Habitat for Wildlife: Providing Context to a Landscape Design that Engages the Public in Nonnative Insect Management
Kayla I. Perry

Redesigning Farm Margins and Highway Edges as Butterfly Corridors
Hyemin Gu and Liwei Shen

West Indies Blend: Re-Shading New England’s Tobacco Valley to Control Aphids
Joshua Diem

Commentary—Tobacco Pest Considerations are Important to Incorporate in Farm-Scape Design
Hannah Burrack

Redesign of a Commercial Cranberry Bog to Promote *Bombus* Mutualism
Ying Zhang

Commentary—Building the Bog for Bees and Berries
Daniel P. Cariveau
INSTRUCTIONS FOR CONTRIBUTORS

Submissions
We welcome submissions to Ecological Restoration from any part of the world. Submissions should relate to the restoration of plants, animals, ecological communities, or landscapes. We understand ecological restoration to be a multidisciplinary and diverse effort and welcome manuscripts considering ecological, and social aspects of restoration, as well as political, economic, legal, and regulatory issues, and other subjects related to ecological restoration. Relevant topics also include techniques and tools for planning, site preparation, species introduction, undesired species control, and monitoring. Manuscripts dealing with plant or animal community composition or general ecology must relate the work explicitly to ecological restoration practice and theory. Similarly, material dealing with reclamation or rehabilitation in a broader sense, or with restoration for economic purposes—economic forestry, range management, waste disposal—must be connected to ecological restoration.

Material may be submitted for the following categories (listed as they are encountered in the Journal):

1. Perspectives
2. Restoration Notes (shorter items, < 1500 words describing project updates, events, innovative technologies, preliminary or unusual findings, thought-provoking concepts, imaginative solutions, commentary, policy reports, etc.)
3. Research articles or reviews on ecological restoration theory, experiments, socio-ecological linkages, education, restoration history, practice
4. Case studies (full length articles describing a particular restoration project or location and lesson learned)
5. Book, journal, website, or movie reviews

Authors of full-length articles or reviews should submit their material online at er.msubmit.net. Manuscripts must be submitted with a cover letter stating that the material has not been previously published, and has not been submitted elsewhere and will not be until a final decision has been reached by the editor. Questions about the online submission site, or general inquiries may be emailed to ERJournal@sebs.rutgers.edu.

Review and Editing Process
Manuscripts are reviewed externally by experts in the field. The process requires approximately four to six months. Restoration Notes are reviewed and edited in-house unless additional expertise is required to evaluate the submission.

Style
Practitioners of ecological restoration are both a core audience and source of contributions to ER. Contributors should use a straightforward style free of unnecessary technical terms and jargon. We prefer the active voice (for example, “We measured three trees” instead of “Three trees were measured”). Please see our Submission Guidelines at er.uwpress.org for more information.

Tables, Photos, and Illustrations
Table and Figure captions should include useful and detailed information, and should be independent of the text. Figures will be reproduced in black and white in the print version of Ecological Restoration (usually requiring higher contrast) and can be reproduced in color in the online version. We use color photos on the front and back covers of the journal and welcome submissions of eye-catching, informative, high-quality photographs.

Page Charges
Payment of $50 per page is requested from authors with research grant or other institutional funds available to underwrite publication costs. Invoices will be sent after composition of pages. Authors with no grant or institutional funds do not need to pay publication costs. Ability to pay page charges is not a condition for acceptance of a manuscript.
