

# Aldo Leopold

His Life and Work  
Curt Meine

Aldo Leopold is unique in the degree to which his life and work continue to exert influence on those who are concerned with the quality of our natural environment. This book is written for those who wish to understand this unusual and gifted man better, as well as for those who wish to gain greater insight into the

evolution of the American landscape. The first comprehensive biography, it will stand as definitive for years to come.

"This is a story well worth reading and, happily, it's good fun to boot. The author has skillfully captured Leopold the man, the scientist, the philosopher—furthermore, anyone who begins to read it will soon be captured, too."

—Gaylord Nelson  
The Wilderness Society

"... the core of American thinking about conservation runs from Thoreau to Muir to Leopold . . . Leopold is the most significant conservationist of the last seventy years; and this is the first full-scale biography, the first to make such extensive use of the Leopold papers. Thus it makes available reams of material that can be found nowhere else. There is no other book like this one."

—Stephen Fox  
Author of *The American Conservation Movement: John Muir and His Legacy*

# Companion to A Sand County Almanac

Edited by J. Baird Callicott

Praised by the *New York Times* for its "high quality" and by *Sierra* for being "first rate," this collection of articles, written by the leading scholars of Leopold and environmental ethics, represents the first sustained look at Leopold's seminal book as a work of art, philosophy, and social commentary. It will enrich the general reader's appreciation of a favorite literary friend while it provides new information and thoughtful analysis for environmental scholars, managers, and planners.

"J. Baird Callicott does for this contemporary vademecum what Philip Van Doren Stern's *The Annotated Walden* did for Thoreau's great work. Roderick Nash pursues Leopold's intellectual heritage. Susan Flader details the history of Leopold's woodland hideaway. Wallace Stegner analyzes the legacy of what he calls an 'almost holy book.' The authority of these and other contributors both confirms its subject's centrality to 20th-century thought and marks the study itself as vital to a wider understanding of its birth."

—Choice

# JOURNAL OF COASTAL RESEARCH

## SUBSCRIPTION INFORMATION

The JOURNAL OF COASTAL RESEARCH (JCR), official publication of the Coastal Education & Research Foundation (a non-profit corporation), acts as a basic world publication for coastal research. The journal publishes original contributions that deal with theory, methodology, techniques, and field or applied studies on inter-disciplinary topics. All aspects of coastal research are considered in the fields of biology, geology, oceanography, environmental (resource) management, and engineering, among others. JCR is surveyed in: *Aquatic Sciences and Fisheries Abstracts; Current Awareness in Biological Sciences; Current Contents/Agriculture, Biology and Environmental Sciences; Ecology Abstracts; FLUIDEX (British Hydromechanics Research Association); GeoAbstracts; USSR Institute of Scientific Information; FAO Marine Science Contents Tables; Oceanic Abstracts; Oceanographic Literature Review; Physics Abstracts, and Pollution Abstracts.*

JCR is published quarterly in English with abstracts in French, German, and Spanish.  
ISSN No. 0749-0208.
